Final Year Project

Hostel Recommender System:
Many students face problems in finding suitable accommodation after getting admission in university. A Hostel Recommender system that allows users to find hostels as per their requirements. It contains lists of hostels which are added by admins. This application will be collected feedback by students who has already resided or currently residing there. It will calculate that how many students will like their hostels or how many students dislike and show in rating. Our system is recommended hostel to new students and show that this hostel is suitable for you. It helps users to find appropriate hostel rooms at distant places even before visiting. This kind of system reduces student's problem of accommodation. The best thing about this system is that it allows users to provide a feedback, rating to hostel about their experience which helps other students.
